

## **GRSMMP State Questionnaire**

### **Problems, Opportunities, Priorities, and Sediment Needs Session**

1. Considering your existing practices for projects involving restoration, conservation, and environmental protection, what are the primary concerns in your state involving RSM (i.e. wetland loss, beach erosion, habitat restoration, etc.) and how can the GRSMMP improve the planning process?
2. What do you perceive to be the key problems and issues that impede regional sediment management in your state and where should efforts be concentrated to support the regional management approach? Are their issues involving regional sediment management across political boundaries?
3. What are the regulatory, policy, and funding constraints that impede regional restoration efforts and sediment management in your area of interest?
4. How important is the establishment of a sediment budget in understanding the sediment processes in relation to managing and planning projects? What do you perceive your sediments needs to be in the near term (10 years) and longer term (50 years) and what sediment type is most desirable?

### **Direction of GRSMMP Session**

1. What actions, as a group, should be taken as a result of this workshop?
2. What are your recommendations to establish key steps to advance the implementation of the GRSMMP? How should we move forward and promote the recommendations that will come out of the GRSMMP?
